Fabulous! Best ever! For me personally the best thing was being able to tap into issues I have blocked, and in my mind for years being relatively negative and thinking I'm not ready for change. Now I actually believe that I can do whatever I want to do - I can make my dreams a reality! I think I'm going to be really busy doing fun stuff when I leave here! Great stuff! I can honestly say that I've started to implement a lot of the things you raised in your training and feel so much better for it. Thanks a million! Keep up the fabulous work you are doing in really making a positive impact to people's lives - thank you!

My professional thanks go to Kath Temple who instills confidence and energy in the humblest of students, proving NLP is the fast-track way to recharge your awareness, detox your cynicism, and help you and your business reach their full potential. Right mindfulness and inner focus remain with you long after this course has finished. Kath Temple offers a brilliant course, which effectively calibrates your work-life – ends those doldrums and life sapping routines, installs a brighter, creative outlook with congruent strategies for effective leadership. I focused on what I wanted from this course, and now feel fortunate to practice NLP strategies daily, enabling me to uplift others and be a catalyst for success.

Whilst I could have done a course in Devon I travelled to Suffolk because Kath Temple had been highly recommended to me. I felt it was worth learning from someone as near to the source of NLP as Kath herself is. It proved to be a good move as I had a great learning experience on one of the best courses I have ever been on; Kath's presentation skills alone were worth the money. It was, however, much more than excellent presentation. I left thinking a lot about a lot of things, to do with myself and my effect to others and that is exactly what I wanted to achieve. There is something for everyone in the course content and the value for me increases now, every time I use NLP. Kath is a great person and a great personality.
I recommend her courses without reservation to,not only Servicemen, but to all.
ADRIAN COLE, MBE, SBS, Royal Navy

Why is NLP so powerful?

NLP studies the structure of how humans think and experience the world. It is the science of personal achievement, behavioural change and much more. It harnesses a highly effective methodology, advanced communication skills and a series of techniques for rapidly changing the thoughts, behaviour patterns and beliefs that limit people's potential and development. NLP examines the relationship between how we think and how we communicate, verbally and non-verbally, and how these affect our behaviour and emotions.

Kath Temple is one of the most truly inspirational people I have ever met. Not only was her fantastic (massive 'value added') NLP and EFT training a vital part of building my coaching practice, her ongoing support, mentoring and advice has been absolutely invaluable. Kath blends her deep integrity, her incredible skills in addressing blocks/limiting beliefs and her astute business acumen to provide a truly unique and outstanding mentoring service. You will not meet a more genuinely positive person, with that rare ability to 'lift' people through her own energy and her passion for helping professionals to develop their own potential.
I can honestly say that working with Kath has been the best decision I have made in my professional and personal development, thank you Kath!

Both colleagues, friends and family have commented on the changes within me and how much more relaxed I am. I now know that I have the skills and confidence to succeed in all areas of my life. Absolutely fantastic!. The NLP Business Practitioner really enabled me to use the new skills and focus them on work related issues and identity. I've learned to manage my own state and how to energise myself in difficult situations. I learned how to manage change in others to achieve a positive outcome. The I have had great fun this morning - Big success in the Senior Management Team, managed to get them thinking and listening (which is no small mountain to climb!!) even started on the Governor at 8:30 this morning and 'opened' the loop - thought it probably best to catch him first thing whilst he was still bleary eyed! Even had a few people comment on how fab my holiday must have been as I look so different and sound so relaxed! Thank you for everything.
I have already changed small practices within the office
and have plans to make changes across the establishment.

KATE ROSS, HR Director, East Anglian Children's Hospices, Cambridge

I really had the most wonderful 9 days and sad that it is all over! NLP and Kath have made me believe that anything can be achieved, whether it's setting those sights higher or handling difficult decisions or situations in a more confident way to achieve what you want. The course will be with me forever, and I told some friends that I would rather have done the course over a holiday! Although I know that there will always be difficulties in life, I have the ability to look for the inner strength and NLP techniques to help me and others through it. If something's not working, it needs to change. What I enjoyed - the music, stories, quotes, videos, taking a moment on the inside, understanding that everyone's map of the world is different and how you can connect to it. Most of all…Kath! So inspirational and an amazing woman! I'd say to people 'Don't underestimate the effect it will have on your life and others lives'.
The most practical life toolkit anyone could hope for.

What can I say about the Masters course - well to be honest I think I would run out of space the course was that good! It gave me so much I think that I shall put it in a metaphor. If you imagine that you have come up against two huge solid doors and you THINK only think that they are super-glued shut and bolted with the strongest of bolts and you don't go near them because you can't open them and then along comes NLP Masters, not only does this give you the tools in the tool box to open the doors it helps you to take the bloody thing off its hinges never again to shut tight! I got so much from the course, and my life thank goodness will never be the same! And from the bottom of my heart I thank you for that Kath. Understanding Self & Others - Metaprograms & Eliciting Values

Metaprograms are one of the key thinking habits of the mind and act as unconscious filters of your ongoing experience. Recognising and using metaprograms in yourself and others will increase your effectiveness at influencing and motivating others.

Values are at the heart of how we live our lives, directing even the smallest choices that we make. Values are the strongest drivers of your motivation. Yet many of these values are held at an unconscious level. Facilitate powerful change for yourself and your clients by learning how to elicit values and realign them to resolve internal values conflicts:

- Learn the six most significant meta programs and how they influence
- Recognise and map patterns of thinking and behaviour
- Discover the art of a systems thinking approach to long-lasting change
- Enhance your ability to create well formed outcomes
- Elicit unconscious values hierarchies
- Resolve internal conflict using values hierarchies

Learned how to dance a different dance with people! It will definitely help with my current contract. Really enjoyed the different ways of raising confidence levels in others and for myself. Learned how to eliminate the negative and build on the positive. Loved NLP - very interesting! I'd love to learn more NLP - move to Lincoln so I can learn to work with other psychologists and learn all your secrets! It's all been really interesting, great to see so many different people taking it all on board!
